LUNDAHL
— TRANSFORMERS —

**Important
Read this!**

With LUNDAHL, all PLATE chokes can be used as POWER SUPPLY chokes and vice versa. Though Power Supply chokes are specified @ ~RMS, and subject to ~100Hz or ~120Hz ripple, they are made with audiophile cores, and full audio range always.

Chokes with high inductance have many windings, and so higher DC resistance. This protects the rectifiers and capacitors. Though you do have some voltage loss across the DC resistance, this resistance limits the current, when the choke is saturated at cold start, due to empty capacitors. In case you do not want the power loss, lower resistance types exist too. For convenient selection, we have put them all here in one table, first sorted by DC Current, then by Henry.

CHOKES for Anode or Power Supply.

Note, there is little logic in the product numbers.

Select from this table first your DC current, then choose the Henry. Mind the DC resistance. Check the Lundahl section, "Plate Chokes" about how and why is it allowed to exceed the rated DC current.

866	8Pin-Octal-Wired. Ceramic-Gold. Large.	399-080-39	Octal. Large Size. Solder lugs with double holes + extra space. For small octal base, EL,34, KT90, KT66. Will not fit wide base like KT88, 6550.	4,76	4,00
867	8Pin-Octal-Wired-HQ. Ceramic-Gold. Cylinder	398-801-18	Octal. Cylinder contacts. High Quality Version, for soldered wires. All metal parts are GOLD plated. (Also the flange is GOLD plated). For KT88, EL34, etc. With fork contacts, for many plug-in / Pull out	2,39	2,01
868	8Pin-Octal-Wired-HQ. Ceramic-Gold. Fork	398-802-33	Octal. Fork contacts. High Quality Version, for soldered wires. All metal parts are GOLD plated. (Also the flange is GOLD plated). For KT88, EL34, etc. With fork contacts, for many plug-in / Pull out	2,39	2,01
869	8Pin-P8/ AU8. NOS Bakelite.	399-093-77	NOS Bakelite socket, black color. For: AZ1, AD1, EL5, EL6, Etc. Very precise made.	7,14	6,00
870	8Pin-Nude-Octal-base (part on the tube)	399-091-43	Repair part for tubes, or use as connector. Brown material. The part on the glass tube.	3,57	3,00
871	8Pin-Nude-Octal-base-Gold (part on the tube)	399-126-71	Repair part for tubes, or use as connector. Brown material. The part on the glass tube.	7,14	6,00
872	9Pin-Magnoval-PCB. Ceramic	399-085-05	White Ceramic socket for PL504, etc. PCB Type.	2,04	1,72
873	9Pin-Magnoval-PCB. Gold. Ceramic	399-086-09	White Ceramic socket for PL504, etc. GOLD plated. PCB Type.	2,55	2,14
874	9Pin-Magnoval-Wired. Ceramic. Gold.	399-087-84	White Ceramic socket for PL504, etc. GOLD plated. For soldered wires.	2,55	2,14
875	9Pin-PCB. Ceramic.	399-081-92	Noval. Standard Ceramic socket, for Printed Circuit Board. For EL84, ECC81. etc	0,47	0,40
876	9Pin-PCB. Ceramic. Gold.	399-113-94	Noval. Gold, Standard Ceramic socket, for Printed Circuit Board. For EL84, ECC81. etc	1,31	1,10
877	9Pin-PCB-HQ. Ceramic.	399-082-79	Noval. High Quality Version, for Printed Circuit Board. For EL84, ECC81. etc	1,61	1,35
